*No terrace should be without
the Harol Duostore!*

Freestanding solar shading

HAROL®

The Harol® Duostore is a freestanding sun protection designed to shade the terraces of cafés, restaurants and hotels or the terraces of private homes. The Harol® Duostore consists of a zinked steel frame, on each side of which a Harol® folding arm awning is fastened with stainless steel screws. The cover board and end cheeks complete the frame to make an aesthetically pleasing unit.

The Duostore can be placed on the terrace in different ways:

- using a stand with a wide base (feet): in this way the Duostore can stand independently
- using a central support to be fastened to the terrace floor
- using a central support to be fixed in concrete or in solid ground

Standard dimensions

The Duostore is available in the following sizes:

possibilities as for width:	3,6 m
	4,8 m
	6 m
possibilities as for extension:	2 x 1,5 m
	2 x 2 m
	2 x 2,5 m
	2 x 3 m
height:	± 2,6 m

Operation

The standard Harol® Duostore is equipped with a remote-controlled electric motor. By using remote control instead of a switch mounted on the frame, you avoid any unauthorized persons from being able to operate the awning, and prevent possible damage to the electrical controls due to heavy rainfall.

A colourful structure

For both the fabrics and the frame there are a wide range of colour choices, so that the Duostore can be perfectly coordinated with your home decor or precisely matched with your corporate colour scheme. The Duostore frame is available in a range of standard RAL colours. At a surcharge, you can choose any other RAL colour or textured coating. There are two types of fabric to choose from - acrylic or polyester (for the Variovalance).

The acrylic fabrics are rot- and mildew-resistant and dirt-repellent. The polyester fabrics are dirt-repellent and washable and also offer a degree of transparency, although sunlight and heat are still kept out very effectively. With acrylic fabrics you have a choice ranging from solid colours, to wide striping, and also fancy striping. The polyester fabrics are available in a number of solid colours. The standard Harol® Duostore comes with a valance which can be signwritten.
